

UNIVERSITY PROJECT: HISTORIC RENOVATION FOR STUDENT-CENTERED OFFICES

Project Overview: Served as team-lead for an extensive renovation project to update the layout and functionality of a historic townhouse for admissions, student services, and career services operations. Worked closely with architect, designers, institutional staff, contractors, and others to represent the needs of the client offices. Managed the relocation and functionality of 15 staff members to alternative space during a six month renovation project.

Before – unused space, awkward layout, two separate townhouses only connected in one spot.

After – an open and connected space with private offices, natural light, and historically correct details.
